

YOUR CHOICE FOR FINE CORPORATE FURNITURE

WALLGOLDFINGER FURNITURE | OVERVIEW

## ABOUT

WallGoldfinger Furniture, with sales, design and engineering offices in a historic Vermont schoolhouse and a state-of-the-art, 130,000-square-foot factory in Massachusetts, is a division of Mark Richey Woodworking.

Mark Richey Woodworking is woman and minority owned business, runs on nearly 100 percent renewable energies, and has been creating the finest quality architectural millwork for four decades. In 2018, Mark Richey Woodworking purchased the nearly 50-year-old WallGoldfinger brand.

WallGoldfinger Furniture builds the world's finest executive furniture, including custom boardroom and conference tables, lecterns and credenzas and meticulously-crafted Arbor and Summit reconfigurable table lines for today's business people. Furniture solutions integrate the latest technology and materials.

This incredible furniture is sold to top corporate, institutional and government decision makers in collaboration with leading architects. Nationally known for its work with Fortune 500 corporations, universities and government agencies, past clients include the White House, New York Stock Exchange, International Monetary Fund and the United Nations.

Client-focused, WallGoldfinger Furniture and Mark Richey Woodworking provide innovative, functional and unique furniture solutions, as well as architectural millwork, to customers worldwide.

## CAPABILITIES

WallGoldfinger Furniture creates the finest corporate furniture for a client's complete meeting, dining and office needs. From modern café tables to reconfigurable multipurpose and conference room product lines to the largest boardroom tables, WallGoldfinger is a whole-project solution.

WallGoldfinger Furniture works collaboratively with architects and specifiers around the world to create the exact furniture needed for one-of-a-kind spaces.

Furniture is available in a large variety of materials from veneer and solid wood to stone, glass, resins and more. Furniture is additionally built in sizes and shapes to meet clients' every need. Simply put: If you can imagine it – and the laws of engineering allow it – WallGoldfinger Furniture's expert design/build team can create it with unmatched craftsmanship and integrity.

## BOARDROOM

When it comes to boardroom tables, most think of WallGoldfinger Furniture first. WallGoldfinger is a national leader in the creation of the highest quality corporate boardroom tables that meet today's designs, integrate the latest technology and are impressive in scale while still accommodating shipping and elevator restrictions.

Available in a variety of shapes, sizes and materials, WallGoldfinger Furniture boardroom tables stand out for their finish durability, stone blending and book-matching, custom stain matching, superior veneering, materials and technology integration, and quality craftsmanship.

Attention to detail from start to finish, and a collaboration with architects, dealers and/or end users all along the way, ensures a flawlessly finished product as unique — and extensive — as the designer's vision.

When a custom boardroom table of the highest quality, and highest capabilities, is needed, choose a WallGoldfinger Furniture table made by the fine craftspeople at WallGoldfinger Furniture and Mark Richey Woodworking.

## CONFERENCE/ TELEPRESENCE

Create the most professional and capable conference environment for your clients and staff with a WallGoldfinger Furniture table.

Available in varied materials, shapes and sizes, WallGoldfinger Furniture conference tables incorporate the latest design trends and technology, including power and data boxes, monitors, microphones and speaker phones, including an exclusive WallGoldfinger flip design that hides a teleconference phone or other device when not in use.

Popular shapes include square, round, elliptical, rectangular, boat and open center in veneers, stone, glass, faux leathers and more. Curved and V shapes are popular in video conference spaces where large screens are to be used.

Whatever your room shape or communications needs, WallGoldfinger Furniture's remarkable custom capabilities can answer your need. Complement your WallGoldfinger conference solution with a credenza or lectern. Or choose a small conference table for your office and let the WallGoldfinger Furniture team help you create a custom desk to match.

## CONFERENCE LINES

Offered in incredibly diverse materials from stone to glass to man-made materials, such as resins and engineered quartz, WallGoldfinger Furniture's conference table and credenza lines, including the Engage and Fuse shown here, meld style and function.

Engage and Fuse feature WallGoldfinger Furniture's *Overlay* reverse knife edge and hidden, under table *Covert Glide* power. The Engage is unique for its narrow, 4-inch wide pedestal base with a clever angle design and layered materials. Fuse's metal tripod base offers a modern touch popular with today's conference solutions and a solid wood version brings warmth to the design for office or home. Both tables also provide wire management solutions to make them not only beautiful but practical.

The Engage and Fuse credenzas, available in 6- and 8-foot lengths, offer a variety of internal components, including drawers, cabinets with doors, waste and recycling receptacle pullouts, and space and ventilation for AV racks.

No matter your room design, Engage, Fuse and other great lines under development offer diverse materials, design and offerings to provide your one-stop conference solution.

## RECONFIGURABLE TABLE LINES

### ARBOR

WallGoldfinger Furniture's Arbor tables provide today's business leaders and organizations with a reconfigurable multipurpose room solution. Typically sold in 30- by 60-inch or 33- by 66-inch sizes, Arbors' legs and modesty panels remove with no tools required. Tops, legs, modesty panels and fixtures boxes store in the industry's most compact upright carts, allowing a room full of tables to easily fit in a storage closet. Arbor tables additionally offer superior leg room, especially when legs are ganged between tables.

### SUMMIT

WallGoldfinger Furniture's Summit tilt-top tables offer the ultimate in reconfigurability and are more than elegant enough for the boardroom. Tabletops tilt to allow them to fit through doorways, and tables are set on casters so they can easily roll to create a new table configuration or to be stored. When the tabletop is lowered, the casters automatically retract for stability. Most commonly made in a 60- by 60-inch size, tables nest for compact storage. And, possibly best yet, Summit tables are even available in stone.

Make the most of your changing conference space with an Arbor or Summit table solution, which are especially popular with rooms with dividing walls.

## EXECUTIVE DINING AND CAFÉ

WallGoldfinger Furniture makes modern café and executive dining tables for today's corporate and hospitality environments.

Tabletop materials often incorporate cast acrylic, back-painted glass, wood veneers, stone and more. A variety of base styles, often in metals, are available to match your unique look. Café and executive dining tables are most commonly made in square, round and rectangular sizes.

Bar height collaborative tables are available to complete your café set-up. Custom tilt-top tables and carts make floor cleaning, reconfiguration and storage easy. And for your executive spaces, traditional style dining tables of the finest materials result in a refined look for your most important guests and provide an opportunity for working lunches where good food fuels great ideas.

Help employees and guests dine in distinguished comfort and quality with a WallGoldfinger dining option. Couple dining tables with ancillary furniture like condiment, casher and maître d' stations or mobile pantry units for a seamless design and modern café sure to impress.

Designs by: Genesler, SOM and Darwin Branded Environments

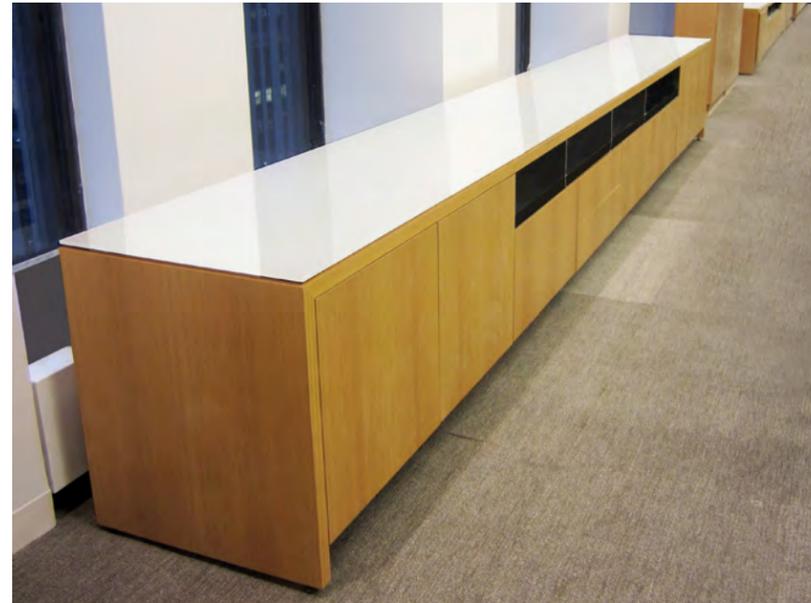

## CREDENZAS AND LECTERNS

Created to complement a table or room design, WallGoldfinger Furniture custom credenzas and lecterns are available in limitless sizes, styles and materials.

Made from stunning wood veneers, stone, glass, metal and more, credenzas are both functional and decorative. Credenzas add work surface and storage to offices. They provide everything from trash receptacles and refrigerators to conference and dining spaces and can even house large retractable monitors for executive teleconference viewing.

Lecterns, including height adjustable models, additionally incorporate technology from microphones to monitors and add a finishing touch, branding opportunity and important communication venue to a premier corporate meeting space.

Complete your boardroom, conference room or office with custom-made credenzas and lecterns from WallGoldfinger Furniture, a division of Mark Richey Woodworking.

## RECEPTION AND EXECUTIVE DESKS

Reception desks are often the first thing clients see upon entering office spaces. Join the nation's leading business, non-profit and government institutions by putting your best corporate foot forward with one-of-a-kind, custom WallGoldfinger Furniture reception desks.

WallGoldfinger Furniture's diverse materials, finishes and custom cutting capabilities result in showpieces that meld beauty and practical work surfaces. WallGoldfinger desks incorporate stone, wood veneers, faux leathers, laminates, metals and have even been crafted for safety by incorporating bulletproof materials.

Carry those diverse materials into the executive suite with a desk or complete office set-up that incorporates the latest, sought-after design elements, such as standing height desks for better health, as well as integrated technology for power and data connectivity.

Greet your guests from behind the security, beauty and integrity of a WallGoldfinger Furniture desk that is sure to be a visual and customer relations focal point.

## WORKSTATIONS AND MOOT COURTS

Provide staff with a professional work environment that meets both workplace needs and your one-of-a-kind office design with custom-made WallGoldfinger Furniture workstations, including administration stations and benching solutions. High-quality materials combine to create showcase workstations for administrative staff thanks to the WallGoldfinger Furniture's expert craftsmanship. Modern benching provides today's mobile workers shared, technology-driven work surfaces.

When it comes to trading desks, work surfaces should reflect and serve the fast-paced, high-tech world of the financial markets. The trading desks shown on this page are finely crafted with cast acrylic, metals, LED lighting and fixed monitors to create a functional yet bold open workplace for the bustling trades industry.

The nation's leading law firms turn to WallGoldfinger Furniture for moot courts. Created for attorneys' offices, law schools and arbitration firms, moot courts include judges' stands and witness and jury boxes to practice trial techniques and questioning. Made from diverse materials and in a variety of configurations to meet a client's unique needs, moot courts are often built on casters and in sections so they can be stored when not in use, freeing up valuable real estate.

## MATERIALS AND TECHNOLOGY

WallGoldfinger Furniture provides the highest quality materials for tabletops, edge details, table bases and more.

WallGoldfinger Furniture uses the finest quality veneers. Marble and granite come from within Vermont and around the world. Metal fabricators help create custom designs in stainless steel, aluminum, bronze and more. WallGoldfinger is additionally a pioneer in glass, solid surfacing and leather. Synthetic leather used is manufactured in the United States, does not contain PVC or plasticizers, and does not emit toxic gases. These high-quality materials are all painstakingly integrated, including with technology needs, for stunning custom looks.

Today's tables, credenzas, lecterns, workstations and more incorporate technology. WallGoldfinger Furniture's detailed engineering and custom-cutting capabilities through state-of-the-art, 5-axis CNC routers make it an industry leader in manufacturing stunning corporate furniture that integrates the latest communication technology, including monitors, power/data, microphones and speaker phones. And WallGoldfinger has established long-term relationships with the top AV design consultants to help you find the perfect solution for your technology needs.

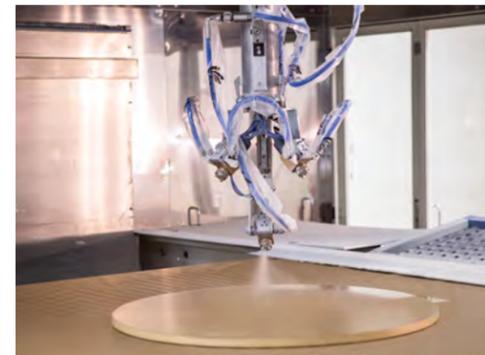

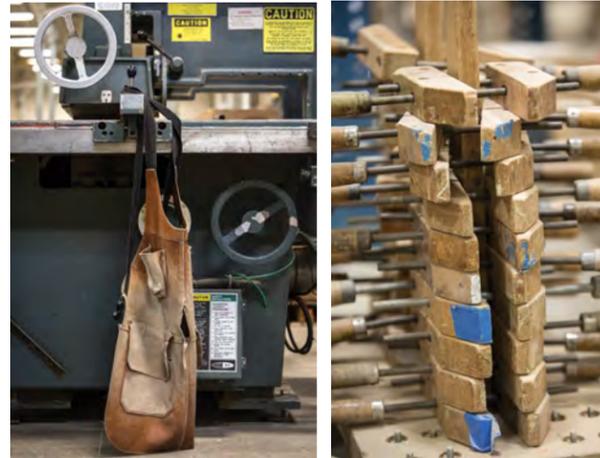

## FACTORY

Built for efficiency and employee health, WallGoldfinger furniture is crafted at its parent company, Mark Richey Woodworking, in Newburyport, Mass. Mark Richey's state-of-the-art, modern, 130,000-square-foot factory features bright open spaces, high-tech equipment powered by renewable energy and some of the most skilled woodworkers the industry has to offer. Many employees have been with the company for decades and have perfected the latest millwork and furniture-making techniques.

The factory itself is powered by on-site wind and solar. And the factory is warmed with heat created from burning waste woods that would otherwise end up in a landfill.

All equipment is state-of-the-art, including 5-axis computer numerical control (CNC) routers offering high-tech custom cutting capabilities. The finishing department is the only in the nation with a robotic system of its type, offering the ultimate in quality, consistency and environmental control.

High-tech equipment, an energy producer rather than user, a remarkably clean work environment and furniture makers' expert skills combine to make the factory your choice for the best corporate furniture that has the added bonus of being responsibly made.

## ENVIRONMENT

WallGoldfinger Furniture utilizes natural resources like wood and stone to build executive furniture for some of the biggest companies in the world. WallGoldfinger is further committed to both creating a positive workplace environment and supporting the natural environment through the use of sustainable, non-toxic products whenever possible, through the use of renewable energy and through reducing waste.

For the East Coast cities of Boston, New York City, Philadelphia and Washington, D.C., WallGoldfinger Furniture is an important resource for Leadership in Energy and Environmental Design (LEED) green building certification. As a Forest Stewardship Council® chain of custody certified manufacturer, WallGoldfinger can further work with you to create FSC® certified furniture made from sustainable wood products.

The Mark Richey Woodworking factory in Newburyport, Mass., where WallGoldfinger Furniture is made, is heated by burning waste woods and powered by on-site wind and solar. Mark Richey Woodworking is among the nation's greenest manufacturers, a member of the U.S. Green Building Council and a recipient of many awards, such as a 2017 winner of the National Pollution Prevention Roundtable Award and a 2018 EPA Merit Award winner. In addition to the use of wind, solar and biomass, the Mark Richey team gives back to its local and world community through relief efforts and building projects, such as in Haiti, Afghanistan and Nepal.
