

ENGINEERED QUARTZ

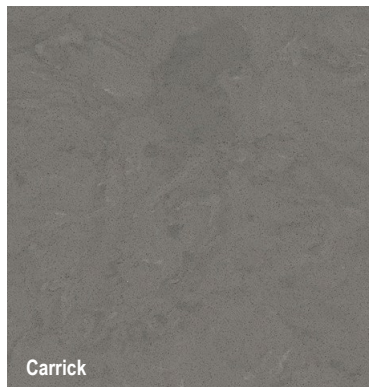

Alpina White

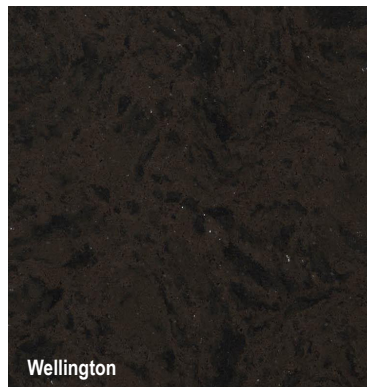

Sharpham

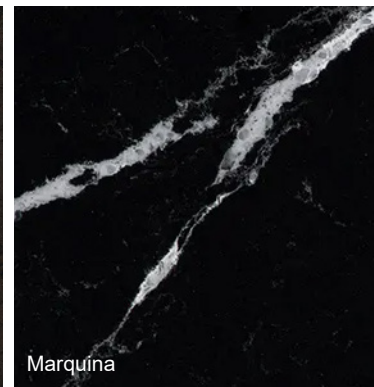

Brittanicca

Carrick

Wellington

Marquina

Engineered quartz brings the best of nature and science together to create a surface with the strength and look of stone while providing greater scratch, stain and corrosion resistance. A combination of mostly stone and a small amount of pigment and resin, engineered quartz is available in a wide variety of color options, including this WallGoldfinger Furniture standard palette. Engineered quartz is nonporous and nonabsorbent, gives off zero emissions and no radon, and is easy to clean.

And just like with all-natural stone, WallGoldfinger Furniture uses state-of-the art CNC cutting to precisely fit other project materials around engineered quartz surfaces for a finished look that is sure to wow.
