

TABLES AND LECTERNS

THE CHALLENGE

An Indiana organization is seeking a high-quality, traditional look for its boardroom table, conference table, dining tables and a series of uniquely designed lecterns. Oh, and it would be great if those dining tables could reconfigure. The inspiration for its furniture? Images of beautiful veneer tables on WallGoldfinger Furniture's website. So who better to build the furniture?

THE SOLUTION

WallGoldfinger has been creating high quality corporate furniture for decades. Working with the client, old designs are modernized into new to fit the organization's exact needs, which include a creative base design, a round version of WallGoldfinger Furniture's patent-pending tilt-top mobile Summit table and lots of beautiful walnut veneer finished in various tones for an especially custom look.

DESIGNER

Darwin Branded Environments
