

CONFERENCE CENTER

THE CHALLENGE

A telecommunications company needs boardroom and conference tables for its New York City offices. The company and its architect are looking for custom pieces, mostly boat shapes, that will meet its executives quality and technology needs, and one table must easily come apart and store to open a room up for larger functions.

THE SOLUTION

WallGoldfinger has been manufacturing custom corporate furniture of the highest quality for decades. Boat-shaped tables are a specialty, as are materials and technology integration. WallGoldfinger’s state-of-the-art factory and expert team can exactly achieve the look and schedule this company requires. WallGoldfinger’s team gets to work drawing, engineering and then building four custom tables from 10 feet to 30 feet in length for this industry leader.

DESIGNER

HOK, New York, NY

MATERIALS

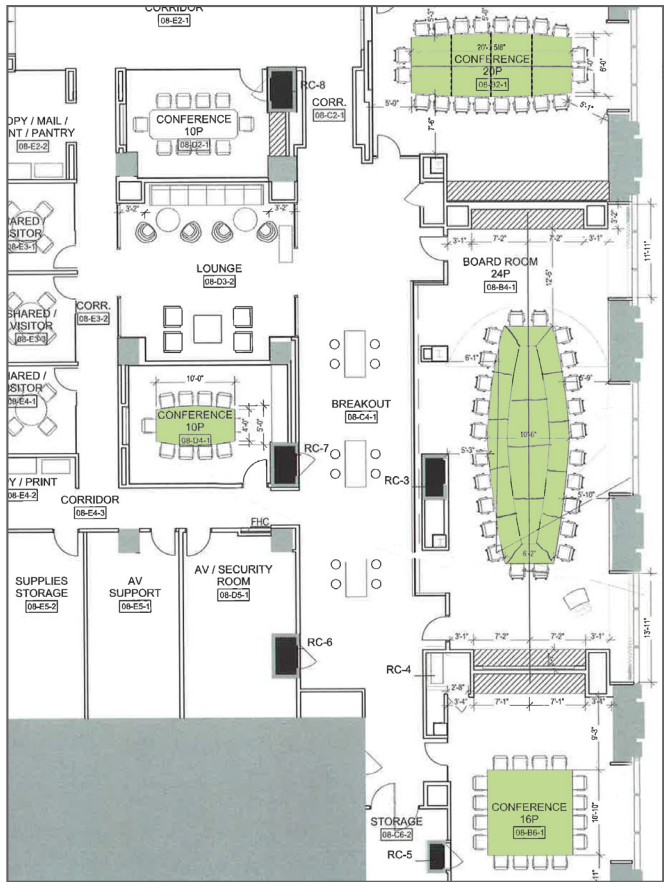

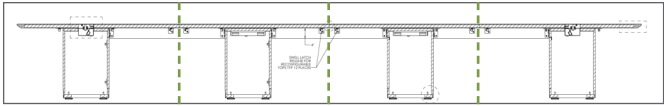

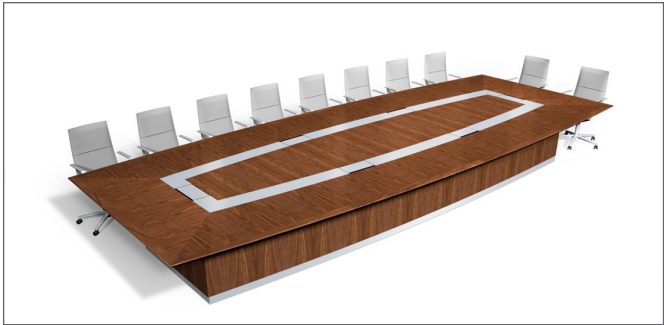

Plain sliced walnut veneer, solid walnut, brushed stainless steel, Glacier White Corian

TECHNOLOGY

Power and data boxes, microphones

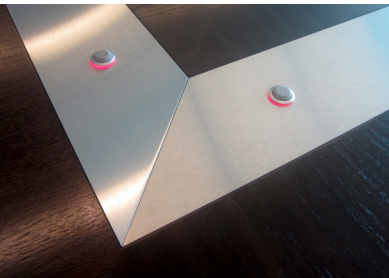

UNIQUE ATTRIBUTES

Boat-shaped, metal inlay, integrated technology, one table comes apart for storage when not in use

floor plan

concept illustrations

“Job well done to all involved. (The company) is having its first boardroom meeting today and you already have some great feedback! It was a pleasure working with everyone, and (I) hope to work with you on the next one.”
