

WALLGOLDFINGER | ARBOR

THE ULTIMATE MULTIPURPOSE ROOM TABLE

BENEFITS

- A reconfigurable table durable and elegant enough for every conference, training and boardroom need
- Incomparable leg room, especially when ganged
- Integrated technology for the most effective meetings and training sessions
- Lightweight cores and removable legs for easy movement and storage
- Quick, compact, damage-free storage in upright carts
- A financially responsible choice due to its multiple uses and minimal storage requirements

33x66 inch rectangular tables and 12 inch modesty panels in dark walnut veneer with aluminum Comfort Edge and 2 inch round legs finished in Bengal Silver powder coat

ABOUT

The Arbor provides today's business leaders and organizations with a reconfigurable conference table solution. Available in a variety of finishes, the Arbor comes in numerous sizes and shapes to fit any room layout. Varied leg and edge styles provide a custom look, and tables are built to integrate the latest technology, turning your striking meeting surface into a versatile communication tool.

Tables can easily be reconfigured. Arbors are constructed from lightweight cores as well as lightweight, yet durable, frames for easy portability. Table legs, modesty panels and fixture boxes are removable without a single tool required so tables can quickly be stored. Table and leg carts are sold for easy and compact storage to open a room up for events and company functions. And the Arbors metal edges have been uniquely designed to be rounded and smooth so they are both gentle on hands and chair arms. Corners are also welded for durability.

When you need an elegant, high technology table solution for a multipurpose room, the Arbor, made exclusively by WallGoldfinger's fine furniture makers, is your choice.

THE ULTIMATE MULTIPURPOSE ROOM TABLE

A conference room once filled with tables becomes an open space for company gatherings and more.

Metal edges are rounded and smooth for both comfort when handling and to prevent damage to chair arms. Corners are also welded for durability.

Tables are easy to store in carts that hold tabletops, modesty panels, legs and fixture boxes. Tabletop slots are lined to protect surfaces and edges.

Tables are constructed from lightweight cores as well as lightweight frames for easy portability.

Modesty panels are easy to add and remove with no tools required.

Legs "gang," meaning a single leg can move over and join two tables, creating a more seamless look and increasing Arbor's already ample leg room.

Wires are managed under the table using hook and loop straps and run discreetly inside a table leg to reach an outlet.

Legs can be removed, and put back on, with no tools required through the use of sturdy swell latches.

Power/data fixture boxes can also be taken on and off with no tools required.

RECONFIGURABLE

Arbor tables offer the perfect solution for multi-purpose rooms. Sold in a variety of sizes, Arbors can stand alone as a desk or dining surface, be grouped for conference seating and trainings, or even be joined to form an elegant boardroom table. Tables join quickly and easily placing a single set of legs between two tables and affixing with sturdy swell latches.

For rooms with multiple uses, the reconfigurable Arbor is the perfect solution.

BENEFITS

- Versatile configuration options allow for:
 - The most effective layout for your meeting needs
 - Layouts that maximize sight lines and improve communication
 - Multiple configurations in conference centers with movable walls
- Leg ganging capability allows for uncluttered look and gains inches of leg room
- Ganged legs can be recessed for increased seating space with greater comfort

SHAPES AND SIZES

Offered in standard rectangles, Arbor tables are also sold in half and quarter rounds to create an elegant, rounded-end look for your executive space. Square tables and wedge shapes give you even more configuration options as you turn a conference room set-up into a boardroom set-up for your most distinguished guests. Modesty panels, which easily attach and detach with no tools required, further enhance the look of the Arbor for even your most discriminating clients.

Make the most of your meeting space with Arbor's many size and shape options.

BENEFITS

- Many standard sizes and shapes available to maximize usability
- Diversity of shapes and sizes allow you to choose the most effective dimensions for both your room size and your meeting needs
- Custom Arbor sizes available for even greater flexibility
- Modesty panels provide option for screening and enhanced elegance, especially in the boardroom

MATERIALS

WallGoldfinger stands above for its ability to source and lay up beautiful veneers finished to perfection. Arbor tables also utilize countless colors of faux leather as well as plastic laminates and cast acrylics to meet customers' unique tabletop materials needs. Metal finishes are available for legs, edges, hatch lids and more.

Whether it's the beauty of veneers, the durability of resins, the soft touch of faux leather or a metal accent, Arbor tables give you choice, beauty and sophistication.

BENEFITS

- Diverse standard tabletop, edge and leg materials provide many opportunities to customize your Arbor to fit your room design
- Stained to match veneers and custom materials are available for even more diverse looks
- Lightweight cores allow for faster and easier set-up and reconfiguration
- Materials are both durable and beautiful for every type of meeting need, from the training room to the boardroom to the café

LEGS AND EDGES

Legs and edges provide additional style to Arbor tables and can help match your tables with existing furniture for a more seamless corporate look. Legs are available in variety of shapes and styles. Edges can turn your table from traditional to modern with a simple touch, and WallGoldfinger's unique metal pan frame *Comfort Edge* provides a smooth, rounded surface that is gentle on hands and chair arms. Additionally, the Arbor provides unprecedented leg room for maximum seating capacity and for the comfort of staff and visitors.

Choose leg and edge styles to meet your unique needs and give your table solution the right look for your organization.

BENEFITS

- The durable, metal *Comfort Edge* is eased, making it comfortable to carry and gentle on chair arms
- *Comfort Edge* mitered corners are welded to prevent separation
- Variety and placement of legs allow for seating on all four sides
- Wire management is concealed in legs for safety and beauty
- Legs attach and detach with sturdy swell latches, or fold, with no tools for easy, compact storage

STORAGE SOLUTIONS

A room full of tables is a room that has many uses, but open space isn't one of them. Arbor tables are quick and simple to flatten and store. Arbor legs go on and off utilizing sturdy swell latches with no tools required, or T-style legs fold or tilt and nest. Modesty panels can quickly be removed as well for flat storage or storage in one of our carts, opening a room for important functions, company get-togethers and more. Make the most of your valuable real estate with a removable Arbor solution.

BENEFITS

- Maintain the uncompromisable quality of your Arbor tabletop surfaces and edges with fabric-lined slots in 30"x36 1/4" carts that hold up to eight tabletops
- Safely and compactly store up to 42 legs in a 30"x22" footprint
- Reduce your overall footprint and save money by using your valuable real estate for meeting and office space, rather than storage space, with this compact solution

Affix 6 removable power/data boxes to the back of upright top, leg and modesty panel carts.

FLOOR PLAN

40 tables seating 80 can fit in as few as 5 tabletop and 3 leg carts taking up less than 90 square feet of storage space

TECHNOLOGY INTEGRATION

WallGoldfinger is an industry leader in technology integration for today's businesspeople, who know that a table is much more than a table: it's a communication tool, media center and active work station. Arbor tables provide you the telecommunication and power access necessary for success in today's business environment.

BENEFITS

- Fixed boxes offering ease of use
- Removable boxes offering greater connectivity
- ETL listed DaisyLink power available for easy reconfiguration and fewer floor cores; connect up to 10 tables from a single floor core
- Hook and loop straps safely secure wiring under the table and provide flexibility for the number and thickness of wires
- Legs provide discreet channels to floor outlets for beauty, safety and maximum productivity

Under table fixture boxes and wire management systems turn a table into a communication tool
