metal

Choose the right material to meet your office needs with the help of WallGoldfinger Furniture.

VENEER

Rift oak - white

Rift oak - light

Rift oak - dark

Quartered walnut - light

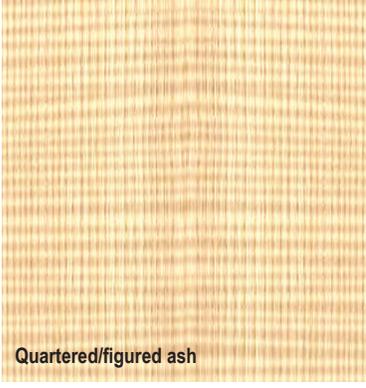

Quartered walnut - dark

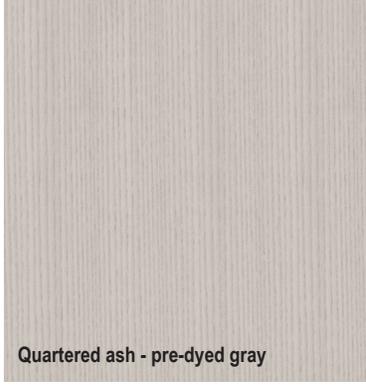

Plain sliced cherry - medium

Quartered black limba

Quartered/figured ash

Quartered ash - pre-dyed gray

Plain sliced ash - ebonized

Quartered zebrawood

Ribbon stripe sapele

Rift cut oak - gray

WallGoldfinger Furniture stands above for its ability to source beautiful veneer finished to perfection. Natural veneers from around the world are carefully selected, fit and finished to perfection.

Choose the beauty of veneers, made durable through our expert finishing process, to create a tabletop style that will be more than a masterpiece; it will be a conversation piece.

Pair our veneers with inlays, edges, metal, stone, glass, faux leather and more to further complete your unique look. Ask us what materials are right for your project and for your budget.

URETHANE

Chantilly Lace

Silver Fox

Tomato Tango

Avalon Teal

Wrought Iron

Black

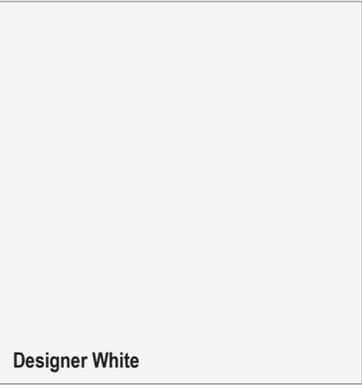

WallGoldfinger Furniture utilizes the highest quality Italian catalyzed acrylic polyurethane. The colored urethanes above match standard Benjamin Moore colors and WallGoldfinger Furniture's standard black.

Many think of painted finishes as lacking in durability, but with this quality of finish, painted surfaces become great options for particularly cabinets and bases. And painted surfaces can be made in high gloss sheens.

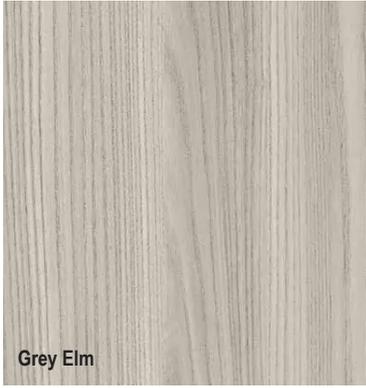

If cost or vibrant color are priorities, consider urethane for portions of your next project.

PLASTIC LAMINATE

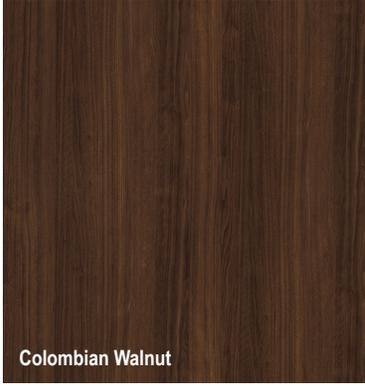

Designer White

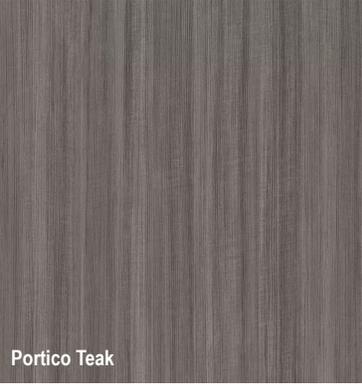

Grey Elm

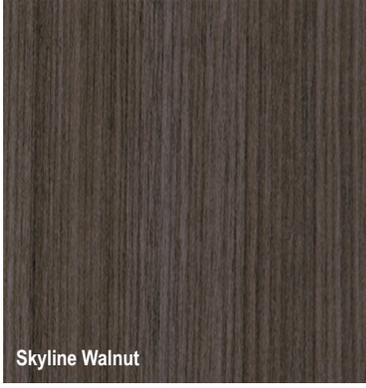

Park Elm

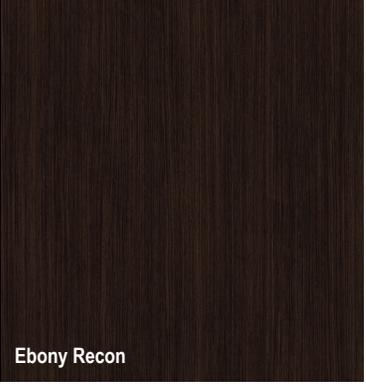

Colombian Walnut

Portico Teak

Skyline Walnut

Ebony Recon

Warm White color-through, soft touch

London Grey color-through, soft touch

Black color-through, soft touch

Enjoy the beauty of a wood finish and the durability of plastic with these laminate finishes. Plastic laminate is a man-made decorative material applied to core materials. Plastic laminates offer an easy to clean surface and often more affordable alternative to wood veneers. Plastic laminates sometimes even include graining and texture reminiscent of wood. Pair a plastic laminate with WallGoldfinger Furniture's high-quality construction and other materials, such as metal, for a top-of-the-line look.

Upgrade to a soft-touch, color-through laminate to create a smooth, high quality work surface, tabletop, technology band or more.

GLASS

Polo Blue

Wall Street

Chantilly Lace

Silver Fox

Iron

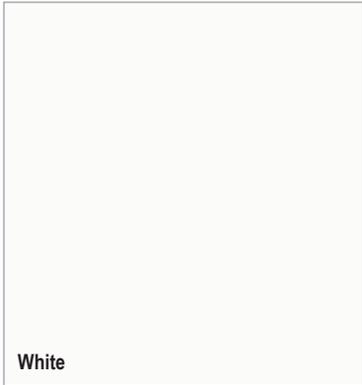

Twilight Zone

WallGoldfinger Furniture incorporates glass into corporate furniture through unsurpassed expertise, design innovation and collaborations with leading glass suppliers. Our design engineers' precise drawings guide glass vendors on exact cut and polish specifications. Your glass is then carefully integrated with other furniture materials, such as veneers and metals. And WallGoldfinger Furniture stands above when it comes to integrating technology with glass surfaces, including glass power and data hatch lids.

Options shown are low iron. When you're looking to add the modern touch of glass to your table, reception desk and more, turn to WallGoldfinger Furniture and its expert team.

CAST ACRYLIC

White

Mink

LIGHTBLOCKS cast acrylic resin provides a long-lasting, stain-resistant tabletop surface and up-to-date look for today's business people. Sometimes back lit or used for other solid surface applications, such as reception desks and dining tables, resin is a modern, lighter weight alternative to back-painted glass.

WallGoldfinger Furniture is experienced in working with resin to provide a carefree surface for the most

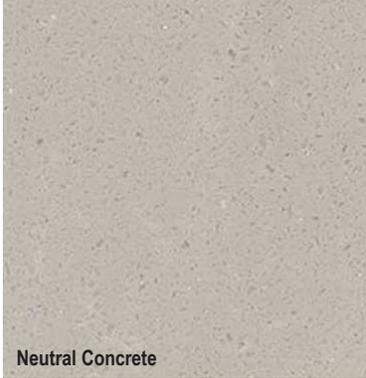

demanding work environments, as well as incorporating resin with other materials.

SOLID SURFACING

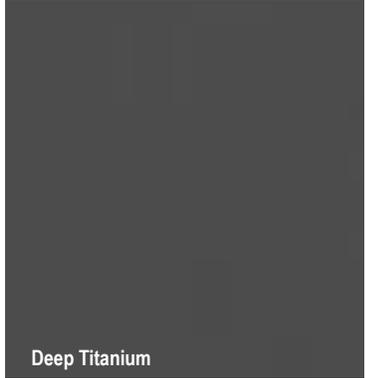

Modern White

Neutral Concrete

Deep Sable

Deep Titanium

Corian solid surface is color-through acrylic polymer and alumina trihydrate material renowned for its durability. Corian is easy to maintain and clean, it does not support microbial growth, is non-porous, absorbs sound, and is resilient and impact resistant. While solid surfacing does expand and contract in changed temperature and humidity like other materials, it can be seamed, especially for small applications. It can also be bent and formed to create unique shapes.

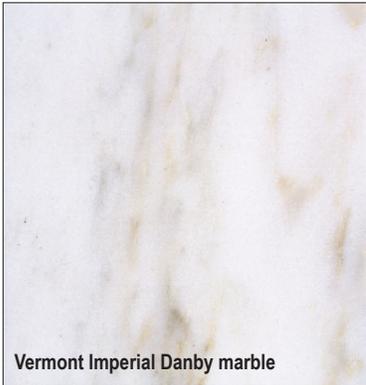

For an easy to clean, long lasting smooth matte surface, consider incorporating Corian into your next piece of WallGoldfinger Furniture. You will no doubt be surprised by its versatility and strength.

STONE

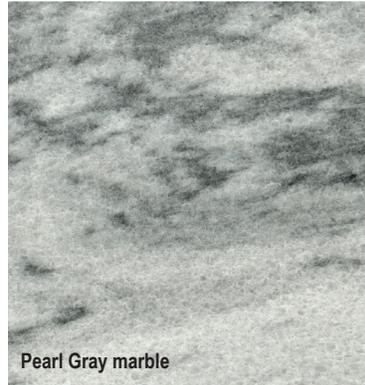

White Carrara marble

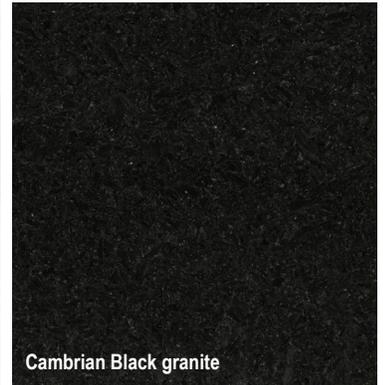

Vermont Imperial Danby marble

Linac

Pearl Gray marble

Cambrian Black granite

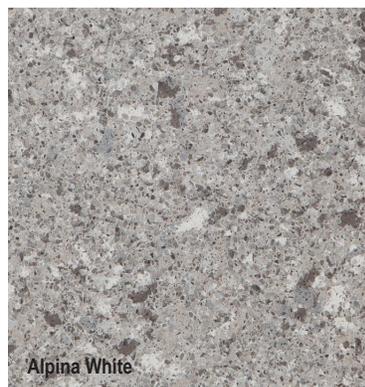

WallGoldfinger Furniture sources marble and granite from around the world, and around Vermont. Our Vermont sales office is located just 60 miles from Vermont Quarries Corp., home of the famed Vermont Danby marble. Vermont is additionally renowned for its bustling granite industry.

When you're looking to make a statement regarding the strength, integrity and reliability of your business, WallGoldfinger Furniture will work with you to create a full or partial stone tabletop.

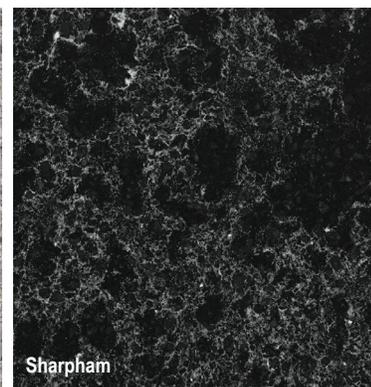

Using state-of-the-art CNC and laser jet cutting methods, we'll precisely fit other project materials with your stone, melding edge details and inlays, wood veneers, technology needs and more into a stunning piece created exclusively for you.

ENGINEERED QUARTZ

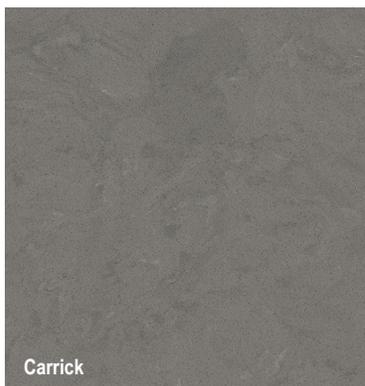

Alpina White

Sharpham

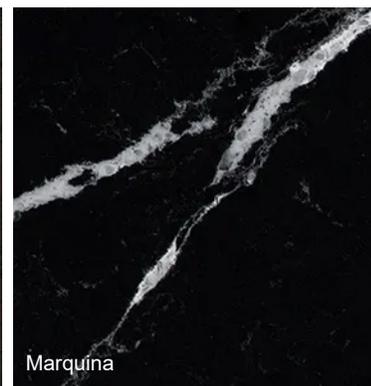

Brittanicca

Carrick

Wellington

Marquina

Engineered quartz brings the best of nature and science together to create a surface with the strength and look of stone while providing greater scratch, stain and corrosion resistance. A combination of mostly stone and a small amount of pigment and resin, engineered quartz is available in a wide variety of color options, including this WallGoldfinger Furniture standard palette. Engineered quartz is nonporous and nonabsorbent, gives off zero emissions and no radon, and is easy to clean.

And just like with all-natural stone, WallGoldfinger Furniture uses state-of-the art CNC cutting to precisely fit other project materials around engineered quartz surfaces for a finished look that is sure to wow.

WALLGOLDFINGER
FURNITURE | a division of Mark
Richey Woodworking

PORCELAIN

Bianco Statuario Venato

Pietra Grey

Noir Desir

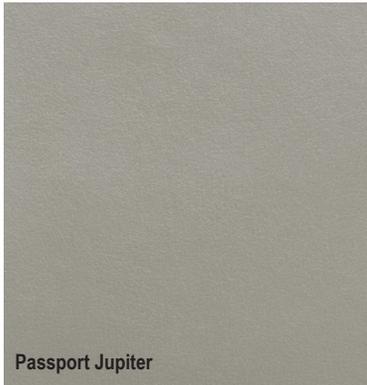

Laminam XL ceramic slabs are available in sizes up to 63.7" x 127.5" and can be as thin as 5mm, making it a perfect light weight and durable alternative to stone. These lighter weight panels are needed for tables that reconfigure and move, such as WallGoldfinger's Summit line of tilt-top conference tables. Ceramic slabs, some called porcelain or ultra compact surfaces, are also resistant to UV light, scratches, stains, heat, abrasion and even extreme cold. In fact, porcelain is a popular choice for exterior applications. And it is ideal for surfaces requiring maximum hygiene, such as tables or credenzas on which food will be served or eaten.

A large variety of colors and sheens are available. One note, though: the pattern on ceramic most often does not go through the material, meaning edges will need to be covered, such as with metal in the case of Summits or could be mitered for fixed furniture.

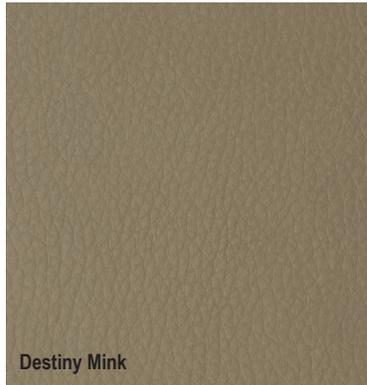

Ask WallGoldfinger Furniture more about porcelain for your next project.

FAUX LEATHER

Passport Jupiter

Destiny Mink

Prestige French Grey

From soft-touch writing surfaces for even the most discriminating executives to leather wrapped pedestals on modern tables, leather can provide a look and texture unlike any other material.

WallGoldfinger pioneered the use of synthetic Majilite leather in corporate furniture using a nylon fiber matrix that is manufactured in the United States, does not contain any PVC or plasticizers, and does not emit toxic gases.

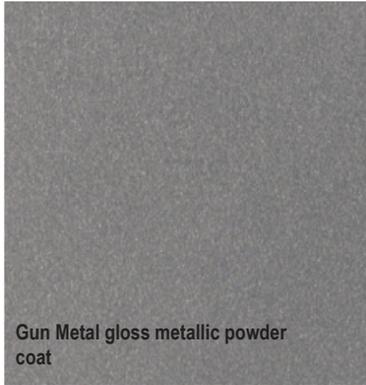

Add the look of leather to your next project with the help of WallGoldfinger Furniture.
